

# The New Earth at The Year 2023

## Part 5

The Universal Time Shift that occurred between the 3rd and 4th of August was the biggest time shift so far, at least that I am aware of in modern times. But the time has shifted many times before, and if we go back a bit to the years 1943, 1947, 1952, 1961, 1963, 1965, 1970, 1981, 1984, 1993, 1998 and 2001, they all had smaller time changes occurring in their timeline and time energies.

The bigger ones, like the one now, do not occur that often. The ones that I can remember as big, giving Earth big changes were 1975, 1991, 2011, and the one now, on the 3rd and 4th of August 2023. In general, in the 20th century and forward, there have not been many small or really big time shifts, 2011 was just a medium-big shift. But, I think this one will be the biggest before the Big Shift to The New Earth.

These forms of Universal Time Shifts occur to adjust Earth and us to a New Timeline. That form of a New Timeline makes the time energies smoother and more flexible before a bigger Universal Shift begins. The smoother and more flexible time energies can — at this moment, before The Big Shift — create Time Loops, so-called “Time Pockets”. These Time Pockets usually reach out from and deviate from any regular and normal, “flat” Timeline. Now, with The New Timeline already installed, everything will be easier and quicker.

Time Pockets are always "used" at all the Big Planetary Shifts occurring everywhere in the Universe. All the species living in the Universe have their own spiritual growth process towards enlightenment, and also their planets have their own growth process and upgrading towards perfection and a planetary form of total enlightenment of everything. So then, in these processes, Time Pockets are many times needed to adjust things that were not finished or solved before the Shift occurred. Things we, or them out there, did not have time enough to do. We might have wanted to visit some special places before, meeting with someone, or taking an education, or fix small or big important things... all of that can be done in Time Pockets. A Time Pocket is not a new option, branch or line of time. It is attached to the regular normal Timeline for you and Earth.

Inside of a Time Pocket you follow the shape of it, the size decides how much time you have, but you can always leave whenever you feel like it. Inside, the world around you will almost seem, feel and look the same as the world you left on your normal Timeline. When done you always have to exit the Time Pocket and go back and enter the normal Timeline again. On that Timeline, just a few seconds have passed, but you might remember months or even years of fantastic

and extraordinary experiences, all of that may be needed for you before going to a new place or planet. So, after we here on Earth maybe use one Time Pocket or more before our Big Shift, we will go back and enter our New Timeline for Earth, before moving over to The New Earth.

We can get help to, or even learn to, create our own Time Pockets. These Time Pockets can continue for a shorter or longer time, it will be as long as you need it to be, from minutes to years.

From any normal Timeline in the Universe the Time Pockets "hang down" like drops. A small "gap" on the Timeline was needed to create each Time Pocket.

The gap needed is just one or a few seconds long or wide on the Timeline.

Normally the gap is not noticeable on the Timeline or its entire history of time.

As said, the normal Time Pockets "hang down", but there are also more angelic ones that "Stand up", also drop-shaped, from the Timeline, all depending on where the Shift occurs in the Universe. Sometimes, however, angels help with a planet's Big Planetary Shift and they then help within specially made Time Pockets.

Our New Timeline is still a little bit unsettled but it will become better and better for us from now on.

**Big Hugs from Channie**
